ORD 1879-64  
3 September 64

MEMORANDUM FOR: Director, National Photographic Interpretation Center

SUBJECT: Indoctrination of [REDACTED]

25X1

1. To follow up on our previous conversations, we would like to have [REDACTED] exposed to your process of photo interpretation with particular emphasis on current techniques used by photo interpreters and problems which you anticipate in the future with regard to human and semi-automatic pattern recognition. [REDACTED] has been briefed on DD/S&T projects for future systems, although her primary experience has been in psychophysics. At the completion of her indoctrination, she will be responsible within ORD for initiating research in the areas of visual information processing, pattern recognition, and psychophysics. It is my hope that her experience at NPIC will give her a better appreciation for Agency-wide problems which can only be achieved by direct observation. [REDACTED] has all of the necessary special clearances to work with your people. Clearance certifications are presently being forwarded to you by the Special Intelligence Security Staff.

2. Perhaps we might begin with [REDACTED] in the testing laboratory prior to the return of [REDACTED] as you suggested. A brief resume of [REDACTED] is attached for your information. I very much appreciate your cooperation in assisting us on this matter.

[REDACTED]  
Deputy Assistant Director  
LS/ORD/DD/S&T
